HOLIDAY HOMEWORK (2024 - 2025)

CLASS - VI

The holiday homework assigned focuses on sustainability, encouraging students to engage in activities that promote environmental awareness and responsible practices that will enable our students to gain valuable insights into sustainable development and contribute to a greener future for Kanpur.

Embracing the 3 R's - Reuse, Reduce, Recycle

Assignment Tasks:

Reuse Challenge:

1. Create a list of items at home that can be reused instead of being thrown away. Examples include old jars as pencil holders, cardboard boxes as storage containers, or cloth scraps for DIY projects.
2. Choose three items from your list and repurpose them into something useful or decorative.
3. Take pictures or make a video documenting your creations.

Reduce Task:

1. Identify at least three areas where you can reduce waste in your daily life. Develop a plan to implement these changes and track your progress over the holidays.

Recycle Project:

1. Find out what materials can be recycled and how they should be sorted.
2. Create a presentation highlighting the importance of recycling.
3. Include tips for your classmates on how to recycle effectively at home and school.

Submission Details:

1. All assignments should be compiled into a PPT presentation. Your presentation must be of 10 slides.
2. Upload your completed assignment on the Google Classroom by 20th June 2024

Remember to have fun while completing these tasks and to reflect on the impact that your actions can have on the environment.

Happy Holidays and Happy Recycling!
